

Government Degree College Banjar, District Kullu

Dr. Renuka Thapliyal
(Associate Prof.)

I am happy to write about the software we purchased for our college to manage all office and financial work. This has streamlined our admission process, generated all relevant reports, and managed data on students' classes, categories and subject-wise. This system is so well designed and managed that a lot of manual work gets reduced. At the same time, it has reduced all clerical work of calculations, and managing accounts with the associated bank. Although the system has a number of functionalities, I would especially like to mention a few benefits it offers to colleges.

- Paperless admission process.
- No setup costs at the college end.
- Software can be updated according to specific needs.
- It provides an Applicant Dashboard (status check of applications, pay fees, view download receipts).
- A student can fill out and check the progress of the application from anywhere.
- Merit lists are generated automatically and roll numbers are allocated.
- Online verification and counselling process.
- It provides an online payment mechanism by integrating a payment gateway connected with all banking systems.
- Generation of all reports related to students and financial matters.
- Student Dashboard
- Status updates of the admission process by Email and SMS.

I would like to thank High Alt Solutions for developing this software and providing excellent services. We are highly satisfied with the quality of services provided by the company. I am thankful to the professionals associated with this software and their timely help in managing it, especially Mr. Aashish, Ms. Priyanka, Ms. Shalini and Mr. Manohar. I wish them great success in the future also.
